

Contents

1. Complex Numbers	1
1.1 Complex numbers and their representations	1
1.2 Algebraic properties of complex numbers	4
1.2.1 De Moivre's theorem	6
1.3 Geometric properties of complex numbers	12
1.3.1 n^{th} roots of unity	14
1.3.2 Symmetry with respect to a circle	15
1.4 Some topological definitions	20
1.5 Complex infinity and Riemann sphere	24
1.5.1 Riemann sphere and stereographic projection	24
1.6 Applications in electrical circuits	26
1.7 Exercises	30
2. Analytic Functions	36
2.1 Functions of a complex variable	36
2.1.1 Velocity of fluid flow emanating from a source	37
2.1.2 Mapping properties of complex functions	39
2.1.3 Definitions of exponential and trigonometric functions	43
2.2 Limit and continuity of complex functions	43
2.2.1 Limit of a complex function	43
2.2.2 Continuity of a complex function	45
2.3 Differentiation of complex functions	47
2.3.1 Complex velocity and acceleration	49
2.4 Cauchy-Riemann relations	50
2.4.1 Conjugate complex variables	54
2.5 Analyticity	55
2.6 Harmonic functions	57
2.6.1 Harmonic conjugate	58
2.6.2 Steady state temperature distribution	63
2.6.3 Poisson equation	66
2.7 Exercises	67
3. Exponential, Logarithmic and Trigonometric Functions	74
3.1 Exponential functions	74
3.1.1 Definition from the first principles	75
3.1.2 Mapping properties of the complex exponential function	77

3.2	Trigonometric and hyperbolic functions.....	78
3.2.1	Mapping properties of the complex sine function	82
3.3	Logarithmic functions	84
3.3.1	Heat source	86
3.3.2	Temperature distribution in the upper half plane.....	88
3.4	Inverse trigonometric and hyperbolic functions.....	91
3.5	Generalized exponential and power functions.....	94
3.6	Branch points, branch cuts and Riemann surfaces.....	96
3.6.1	Joukowski mapping	100
3.7	Exercises	103
4.	Complex Integration	109
4.1	Formulations of complex integration	109
4.1.1	Definite integral of a complex-valued function of a real variable	110
4.1.2	Complex integrals as line integrals	111
4.2	Cauchy integral theorem.....	118
4.3	Cauchy integral formula and its consequences	127
4.3.1	Derivatives of contour integrals.....	128
4.3.2	Morera theorem.....	132
4.3.3	Consequences of the Cauchy integral formula.....	133
4.4	Potential functions of conservative fields	137
4.4.1	Velocity potential and stream function of fluid flows.....	137
4.4.2	Electrostatic fields	150
4.4.3	Gravitational fields.....	153
4.5	Exercises	157
5	Taylor and Laurent Series	166
5.1	Complex sequences and series	166
5.1.1	Convergence of complex sequences	166
5.1.2	Infinite series of complex numbers.....	168
5.1.3	Convergence tests of complex sequences	169
5.2	Sequences and series of complex functions	172
5.2.1	Convergence of series of complex functions	172
5.2.2	Power series.....	174
5.3	Taylor series.....	178
5.4	Laurent series	184
5.4.1.	Potential flow past an obstacle	192

5.5 Analytic continuation	195
5.5.1 Reflection principle	197
5.6 Exercises	198
6. Singularities and Calculus of Residues	207
6.1 Classification of singular points	207
6.2 Residues and the Residue Theorem	212
6.2.1 Computational formulas for evaluating residues	214
6.3 Evaluation of real integrals by residue calculus	218
6.3.1 Integrals of trigonometric functions over $[0, 2\pi]$	218
6.3.2 Integrals of rational functions	219
6.3.3 Integrals involving multi-valued functions	221
6.3.4 Miscellaneous types of integrals	225
6.4 Fourier transforms	228
6.4.1 Fourier inversion formula	229
6.4.2 Evaluation of Fourier integrals	234
6.5 Cauchy principal value of an improper integral	236
6.6 Hydrodynamics in potential fluid flows	243
6.6.1 Blasius laws of hydrodynamic force and moment	243
6.6.2 Kutta-Joukowski lifting force theorem	247
6.7 Exercises	248
7. Boundary Value Problems and Initial-Boundary	
Value Problems	257
7.1 Integral formulas of harmonic functions	258
7.1.1 Poisson integral formula	258
7.1.2 Schwarz integral formula	264
7.1.3 Neumann problems	268
7.2 Laplace transform and its inversion	271
7.2.1 Bromwich integrals	275
7.3 Initial-boundary value problems	281
7.3.1 Heat conduction	281
7.3.2 Longitudinal oscillations of an elastic thin rod	286
7.4 Exercises	290
8. Conformal Mappings and Their Applications	301
8.1 Conformal mappings	301
8.1.1 Invariance of the Laplace equation	308
8.1.2 Hodograph transformations	314

8.2 Bilinear transformations.....	318
8.2.1 Circle preserving property.....	320
8.2.2 Symmetry preserving property	323
8.2.3 Some special bilinear transformations	331
8.3 Schwarz-Christoffel transformations.....	338
8.4 Exercises	348
Solution to Exercises	358
